

**AMENDMENT TO THE CLAIMS**

Claims 1-13. (*Canceled*)

Claim 14. (*Currently Amended*) An assembly comprising:

a shoe and a device for flexural stiffening and/or protection of the shoe;

said shoe ~~having~~ comprising:

an upper including a flexion fold zone, an upper front surface, and a flexible front end zone; ~~zone;~~ and

a sole;

said device including a rigid or semi-rigid cover covering said upper front surface of said shoe and extending from within said flexion fold zone of said shoe to said front end zone of said ~~shoe;~~ shoe;

said rigid or semi-rigid cover being more rigid than said upper front surface and said flexion fold zone of the shoe so as to interfere with free flexing of the shoe while a wearer's foot is positioned within the shoe.

Claim 15. (*Currently Amended*) A device for flexural stiffening ~~and/or~~ and protection of a shoe, including a device for a sports shoe adapted to be fixed onto a sports apparatus, said device comprising a cover configured and arranged to cover a front surface of the shoe and to extend ~~extending~~ from within a flexion fold zone of the shoe to a front end zone of a sole of the shoe, said cover being made of a rigid or semi-rigid material in an entirety of a longitudinal extent of said cover.

Claim 16. (*Previously Presented*) A device according to claim 15, further comprising a journal connection for connecting the device to the sole of the shoe.

Claim 17. (*Previously Presented*) A device according to claim 16, wherein said journal connection is located with respect to said device to be connected to a front zone of the shoe.

Claim 18. (*Previously Presented*) A device according to claim 15, wherein the device is configured to be removably mounted to the shoe.

Claim 19. (*Previously Presented*) A device according to claim 15, wherein the device extends from a tibial support zone to a metatarsophalangeal articulation zone and/or the zone of the base of the toes.

Claim 20. (*Previously Presented*) A device according to claim 15, wherein the device further comprises an insert, affixing the device to the shoe by the sole, and a cover, affixed to the insert, which completely or partially covers the front surface of the latter by manual thrust or traction from a user.

Claim 21. (*Previously Presented*) A device according to claim 20, wherein the insert and the cover form a journal, the insert constituting a fixed portion thereof, and the cover constituting a portion movable along a front-to-rear direction of movement.

Claim 22. (*Previously Presented*) A device according to claim 20, wherein said insert is implanted along an axis transverse to a longitudinal axis of the shoe.

Claim 23. (*Previously Presented*) A device according to claim 22, wherein the insert is implanted beneath or on opposite sides of said sole, in a zone demarcated at a front by a tip of a foot, at the rear by the front surface of a plantar arch, and laterally by the edges of the sole in their entire thickness.

Claim 24. (*Previously Presented*) A device according to claim 20, wherein the device is mounted to the shoe by an insertion method using a shaft and lateral inserts extending through all or part of the sole of the shoe.

Claim 25. (*Currently Amended*) A device according to claim 16, wherein the cover has a pseudo-anatomical shape corresponding to said front surface of the shoe, capable of covering the shoe completely or ~~partially and constituted of rigid or semi-rigid materials~~ partially.

Claim 26. (*Previously Presented*) A device according to claim 15, wherein the device is fixed to an upper and/or mid portion of the device by retaining and immobilizing means on the shoe.

Claim 27. (*Previously Presented*) A device according to claim 15, comprising a plurality of covers to be associated with the same shoe, said plurality of covers including said cover, said plurality of covers having respectively different rigidities.

Claim 28. (*Previously Presented*) A shoe comprising a stiffening device according to claim 15.

Claim 29. (*Currently Amended*) An assembly comprising:

an article of footwear and a device for increasing flexural rigidity and protection of the article of footwear;

said article of footwear including an upper and a sole, said upper including a flexion fold zone, a tibial support zone, ~~an upper front surface~~, and a front end zone;

said device including a cover covering said flexion fold zone of said article of footwear and extending forwardly from said flexion fold zone at least to said front end zone of said article of footwear, said cover being rigid or semi-rigid at said flexion fold zone and at said front end zone.

Claim 30. (*Currently Amended*) An assembly comprising:

an article of footwear and a device for increasing flexural rigidity and protection of the article of footwear;

said article of footwear including an upper and a sole, said upper including a flexion fold zone, an upper front zone, and an upper rear zone, and a front end zone, at least one portion of said upper is flexible;

said upper front zone of said upper being contiguous with and extending above said flexion fold zone in an upward direction to adapt the upper front zone to be positioned forward of a lower leg of a wearer of the article of footwear;

said upper rear zone of said upper extending in said upward direction to adapt the upper rear zone to be positioned rearward of the lower leg of the wearer of the article of footwear;

said front end zone of said upper extending in a direction forward of said flexion fold zone;

said device for increasing ~~flexural~~ rigidity in flexion at least of said upper front zone folding toward said front end zone, said device and protection of the article of footwear comprising a cover having three parts, said three parts including an intermediate part, an upper part, and a lower part;

said intermediate part of said cover covering said flexion fold zone of said upper of said article of footwear;

said lower part of said cover extending forwardly from said intermediate part of said cover along an area above said front end zone of said upper of said article of footwear;

said upper part of said cover extending upwardly from said intermediate part of said cover along an area in front of said upper front zone of said upper of said article of footwear, said upper part of said cover extending substantially in said upward direction of ~~the~~ said upper front zone and said upper rear zones zone of said upper of said article of footwear, said cover comprising a rigid or semi-rigid material in said upper part, in said intermediate part, and in said lower part, said rigid or semi-rigid material comprising a material more rigid than said flexible portion of said upper.

Claim 31. (*Previously Presented*) An assembly according to claim 29, wherein said cover extends from a tibial support zone to a zone of a metatarsophalangeal joint of the article of footwear and/or a zone of a base of the toes of the article of footwear.

Claim 32. (*Previously Presented*) An assembly according to claim 29, wherein said device further comprises at least one tightening strap extending rearwardly and downwardly at an instep zone of the article of footwear.

Claim 33. (*Previously Presented*) An assembly according to claim 29, wherein said device further comprises at least one tightening strap extending at least rearwardly from a tibial support zone of the article of footwear.

Claim 34. (*Previously Presented*) An assembly according to claim 29, wherein said device further comprises at least one tightening strap extending at least rearwardly from a tibial support zone of the article of footwear and at least one tightening strap extending rearwardly and downwardly from an instep zone of the article of footwear.

Claim 35. (*Previously Presented*) An assembly according to claim 29, wherein said cover is attached to a front end zone of said sole of said article of footwear.

Claim 36. (*Previously Presented*) An assembly according to claim 29, wherein said cover is attached to a forward zone of said sole, said forward zone of said sole extending forwardly from a front end of a plantar arch of said sole.

Claim 37. (*Currently Amended*) An assembly according to claim 36, further comprising a fastening mechanism attaching said cover to said sole at a forward zone of said sole, said fastening mechanism ~~cover~~ connecting said cover to said sole only in said forward zone of said sole.

Claim 38. (*Previously Presented*) An assembly according to claim 29, wherein said cover is pivotally attached to a forward zone of said sole of said article of footwear, said cover being movable between a forwardmost open position and a rearwardmost closed position.

Claim 39. (*Previously Presented*) An assembly according to claim 38, wherein said upper of said article of footwear comprises a footwear tightening system, said cover at least partially covering said footwear tightening system in said closed position.

Claim 40. (*Previously Presented*) An assembly according to claim 29, wherein said sole comprises a plantar arch, and wherein said cover is spaced above said sole, at said plantar arch, a distance greater than a distance said cover is spaced above said sole at a front end zone of said article of footwear.

Claim 41. (*Previously Presented*) An assembly according to claim 29, wherein said cover is spaced above a median part of said sole a distance greater than a distance said cover is spaced above said sole at a front end zone of said article of footwear.

Claim 42. (*Previously Presented*) An assembly according to claim 29, wherein said upper of said article of footwear further comprises a closing zone having a longitudinally extending contour, wherein said cover has a lower edge having a longitudinally extending contour, and wherein said longitudinally extending contour of said lower edge of said cover generally follows said longitudinally extending contour of said closing zone.

Claim 43. (*Previously Presented*) An assembly according to claim 29, further comprising a plurality of covers, said plurality including said covers, said plurality having respectively different rigidities.

Claim 44. (*Currently Amended*) A snowboard boot assembly comprising:

a snowboard boot and a device for increasing flexural rigidity of said snowboard boot to improve transmission of forces from said snowboard boot to an attached snowboard;

said snowboard boot including an upper and a sole, said upper including a front end zone, a flexion fold zone, ~~an upper front surface~~, an ankle zone, and a portion extending above said ankle zone;

said device including a cover for increasing flexural rigidity of said snowboard boot, said cover being attached to a said front end zone of said snowboard boot and extending rearwardly to cover said flexion fold zone zone;

said upper of said snowboard boot being relatively flexible and said cover being relatively rigid in said front end zone, in said flexion fold zone, and in said portion extending above said ankle zone.

Claim 45. (*Canceled*)

Claim 46. (*Previously Presented*) A snowboard boot assembly according to claim 44, wherein said cover is attached to a front end zone of said sole.

Claim 47. (*Previously Presented*) A snowboard boot assembly according to claim 44, further comprising a fastening mechanism attaching said cover to said sole at a front end zone of said sole, wherein said cover is attached to said sole only in said front end zone.

Claim 48. (*Previously Presented*) A snowboard boot assembly according to claim 44, further comprising a plurality of covers, said plurality including said cover, said plurality having respectively different rigidities.

Claim 49. (*New*) An assembly according to claim 14, wherein:

said rigid or semi-rigid cover is a rigid cover.

Claim 50. (*New*) An assembly according to claim 14, wherein:

said cover comprises a single piece of material along an entirety of a longitudinal extent of said cover.

Claim 51. (*New*) A device according to claim 15, wherein:

said cover is made of a rigid material along the entirety of the longitudinal extent of said cover.

Claim 52. (*New*) A device according to claim 15, wherein:

said cover comprises a single piece of material along the entirety of the longitudinal extent of said cover.

Claim 53. (*New*) An assembly according to claim 29, wherein:

said cover is rigid or semi-rigid at said tibial support zone.

Claim 54. (*New*) An assembly according to claim 29, wherein:

said cover is rigid at front end zone, at said flexion fold zone, and at said tibial support zone.

Claim 55. (*New*) An assembly according to claim 29, wherein:

said cover comprises a single piece of material along an entirety of a longitudinal extent of said cover.

Claim 56. (*New*) An assembly according to claim 30, wherein:

said cover comprises a rigid material along an entirety of said upper part, an entirety of said intermediate part, and an entirety of said lower part.

Claim 57. (*New*) An assembly according to claim 30, wherein:

said cover comprises a single piece of material along said upper part, said intermediate part, and said lower part.

Claim 58. (*New*) A snowboard boot assembly comprising:

a snowboard boot adapted to be fixed to a snowboard, said snowboard boot comprising:

a sole adapted to be supported on the snowboard;

an upper comprising:

a tibial support zone adapted to cover at least a front portion of a lower leg of a snowboarder;

a front end zone extending from a front end of the upper to an instep of the upper;

a flexion fold zone between said tibial support zone and said front end zone;

a front spoiler for increasing rigidity of flexion of said upper at least in said flexion fold zone for improving transmission of forces from the snowboarder to the snowboard, said cover extending in said tibial support zone, said front end zone and said flexion fold zone.

Claim 59. (*New*) A snowboard boot assembly according to claim 58, wherein:

said spoiler comprises a semi-rigid material in said tibial support zone, in said front end zone and in said flexion fold zone.

Claim 60. (*New*) A snowboard boot assembly according to claim 58, wherein:

said spoiler comprises a rigid material in said tibial support zone, in said front end zone and in said flexion fold zone.

Claim 61. (*New*) A snowboard boot assembly according to claim 58, wherein:

said spoiler comprises one piece of material in said tibial support zone, in said front end zone and in said flexion fold zone.
